

Basic Microbiology for Activated Sludge

Instructor: Nora Lough

This course will teach basic microbiology concepts for use in operating and controlling activated sludge processes used in wastewater treatment.

Topics to be covered will include:

- The role of microorganisms and conditions necessary for wastewater treatment using activated sludge
- Identification of key microorganisms
- Causes and control of common activated sludge process problems
- Advances in biological treatment including bioreactors and nutrient removal

Please bring a sample of activated sludge if available for analysis in the class

Tuesday August 16, 2016 8:30 - 11:30 AM

Narragansett Bay Commission Fields Point Education Room— Administration Building 1 Service Road, Providence, RI

COST: \$10 for NWPCA Members

\$30 for Non-Members (includes 1-year membership)
