

# Maintenance in the Wastewater Treatment Facility

**Instructor: Michael Spring**

This 3 hour workshop introduces and focuses on maintenance programs in the wastewater treatment facility. This class will cover the following topics:

- Types of programs needed to provide and sustain good maintenance
- Obstacles that maintenance programs face on a day to day basis
- How to categorize and prioritize workloads
- Address how to estimate workloads and repair times

Maintenance modes such as firefighting and run to failure will be discussed. An emphasis on the importance and need for open communication as well as how to create reports to track progress over the long term will be addressed.

**Wednesday December 7, 2016**

**8:30 - 11:30 AM**
