- The workday is spent driving the truck to various sites and outside while setting up, operating and tearing down the equipment.
- Operator must be OSHA trained and have a clean driving record.
- Operator will complete daily inspection of the truck.
- Operator will work on excavation sites, Municipal and State job sites, easements, and other miscellaneous locations.
- Perform manual labor when required and work long hours if necessary.
- Practice safety at all times including driving of company vehicles or use of equipment, which includes the use of PPE while on jobsite.

Qualifications:

- Valid license, CDL Class B
- High School Diploma or GED preferred
- OSHA 10 Card
- Clean driving record for past 5 years
- Ability to pass pre-employment physical and drug screen
- Proven ability to work with customers
- Ability to maintain and service the truck and equipment
- Ability to work in a team environment and take direction from various people
- Ability to work long hours performing repetitive movements
- Must be willing to travel and work away from home when required and work long hours
- Ability to work in all environmental conditions but especially in a dry and hot environment for 10 or more hours a day
- Good work ethic, punctuality and alertness
- Mechanical – Knowledge of equipment, machines and tools including their designs, uses, repair, and maintenance
- Willingness to comply and follow all company OSHA safety rules

Compensation:

A competitive hourly rate and full benefits package is available.

Benefits:

- Medical/Dental Insurance coverage
- 401K Option
- Company provided safety, skill development and leadership training opportunities
- Paid Holidays
