

# Maintenance and Lubrication in the Wastewater Treatment Facility

**Instructors: Michael Spring and Greg Campo**

This 3 hour workshop introduces and focuses on maintenance and lubrication. This class will cover the following topics:

- Types of programs needed to provide and sustain good maintenance
- Obstacles that maintenance programs face on a day to day basis
- How to categorize and prioritize workloads and repair times
- Lubricants and factors of oil types, quality, and cleanliness
- Selection of correct lubricants; oil analysis, storage, and test comparison

Maintenance modes such as firefighting and run to failure will be discussed. An emphasis on the importance and need for open communication as well as how to create reports to track progress over the long term will be addressed.

**Tuesday May 22, 2018**  
**8:30 - 11:30 AM**

Narragansett Bay Commission  
Fields Point Education Room— Administration Building
