

# NASSCO's Pipeline Assessment, Lateral and Manhole Certification Program

Instructor: Steve Henning, Vortex Companies

The NASSCO certification program is extremely valuable to all asset owners and advances the professionalism of the entire industry.

The primary purpose of PACP® training and certification is to assure that all data gathered to describe the conditions within a pipe are collected and coded in a consistent and reliable manner.

Because this program clearly defines pipes conditions and defects in a uniform manner everyone in the program will all agree on future CCTV assessment descriptions. Students must demonstrate an understanding of the contents through the successful completion of a certification examination.

**November 13 and 14th, 2018 8:30-4:30**  
**Registration begins at 8:00AM**

Warwick Sewer Authority  
Conference Room
